

Welcome Aboard

Your safety is our priority...

Welcome, it's great to have you aboard. We want this to be a safe and enjoyable journey and for the comfort of all it's a non-smoking ship.

Moving Parts

When we are underway, it's important to keep clear of moving ropes and the boom; which can travel from side to side when we change course.

Please also maintain a clear path around the edges of the boat and up the centre so the crew can attend to the sails and anchor when required.

Life Jackets & Rafts

If required, life jackets can be found behind the saloon seat down below on the right hand side. But if you'd like to wear one at all times, simply ask a crew member. Should someone fall overboard the life ring at the back of the boat should be thrown and someone should keep the person in sight at all times. Two life rafts are also carried which will be deployed by the crew if required. In the unlikely event of an emergency follow the instructions of the crew.

Always keep a grip

When walking around the boat, always keep a good grip with at least one hand, to avoid slipping or falling.

Toilets

If you need to go, please wait till we're out of port and just check first with a crew member to ensure the water intake valve is open.

Feeling Sick?

Fresh air and looking to the horizon are good ways to manage seasickness. Remember to keep your fluids up and ask for some lemonade if you're feeling off colour; it can do wonders. Also keep warm and dry and if you're hungry ask a crew member for something to eat.

Questions?

If you have any questions, or you notice something unusual, don't be afraid to ask or sing out.

Welcome and we trust you have a memorable time.
